

Cindy Choi

Cindy's story

Cindy's interest in programming started in high school, where she learned Pascal and some C++. Over time she taught herself more programming and found web development. She's now looking to apply what she's learned as a developer while continuing her learning journey (she's also taking a fullstack certificate right now, as well as learning D3, doing personal side projects, and reading programming books!).

Cindy's pronouns

She/Her

What makes Cindy unique

Cindy's thirst to learn more and broaden her technical horizon has amazed the Bridge team. In mentor sessions, her mentor found her humble, curious and driven. She plans mentor topics and also raises valuable questions in software development. Cindy is extremely thoughtful and in her words "wants to live a life driven by curiosity".

What Cindy's looking for

Cindy is looking for the right fit in her next role, which for her means somewhere where she can grow as a developer, gain more experience with backend technologies, and continue learning through challenging work. She is also interested in contract work. She likes project-based work so that there are new challenges frequently.

Technologies Cindy has experience with

Lots of experience with: Javascript, React, Redux

Some experience with: Express, MongoDB/Mongoose, Node, Vue, git, CSS/Bootstrap, D3
